### Solution Architecture:

#### Goals of the Architecture:

- Automate data management
- Keep student data accurate
- Reduce manual work and errors
- Simplify admission and progress tracking

#### Key Components:

- Tables: Student Master, Admission, Progress
- Scripts: Auto-fill, Calculate grades, Address from pincode
- Workflow: Admission status tracking
- Forms: Easy-to-use layouts

#### Development Phases:

1. Setup tables
2. Design forms
3. Add automation scripts
4. Create workflow
5. Test everything
